

Steelmade desk based modular furniture, seating & storage solutions.

Established since 1948.

A storage solutions company wherein we customise systems to maximise space utilisation.

Company Profile

Circa 1948, the date our company steelmade made its mark in the Indian furniture sector. Steelmade has a long standing history when it comes to a wide variety of storage systems. We provide storage solutions to the/a growing need of space conservation in the form of compactors, industrial racking systems (pallet racking, long span racks), locker systems, library racking systems, retail racking systems, optimiser systems, cupboards and modular desk based systems.

All of Steelmade's products are created with an aesthetic keeping in mind the forever evolving 'design thinking' aspect of the Indian corporate/industrial sectors. Only the finest quality product components are used to create our storage systems, seating systems and modular desk based systems. Innovation and improvisation are key elements to our creation process with our qualified team of workers ever ready for a healthy challenge. Customisation thereof becomes a key factor as per individual client needs.

We intently stress on our after sales services as we believe that our role does not end at providing you with an excellent product. The after sales services are adjusted towards a very nominal cost for the said client.

"On matters of style, swim with the current, on matters of principle, stand like a rock." – Thomas Jefferson
